DETAILED ACTION

1. Claims 1-36 are pending.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to an apparatus and system of a node and associated hardware, classified in class 712, subclass 214.
 - II. Claims 18-36, drawn to partitioning a program into groups of instructions, classified in class 712, subclass 13.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as computing instructions and being connected to other nodes, which doesn't require the specific method of partitioning a program as disclosed in invention II, as invention I is only directed to a computing node. See MPEP § 806.05(d).
3. It is noted by the Examiner that Claims 28-36 are being grouped with Claims 18-27, due to the data (instructions) of the claims performing the method of Claims 18-27. It is further noted that the Examiner has interpreted the "data" of Claims 28-36 to be instructions, as it is stated as such in the Applicant's specification, however, Examiner

Art Unit: 2183

would appreciate a clarification to the data being instructions, as data by itself cannot result in a machine performing the steps of the Claim, and in that case, Claims 28-36 would be given their own group in the restriction, which would comprise an article containing data, which would be unrelated to either of the other two inventions as discussed above.

4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Telephone Restriction Practice

3. Section 812.01 of the Manual of Patent Examining Procedure (MPEP) states the Examiner does not have to telephone the attorney or agent in cases where the Restriction is deemed complex. The Restriction/ Election is deemed complex by the Examiner and the attorney/agent should be afforded the benefit of receiving the action for careful review and time to formulate a response.
